## Summary

Working with web development for more than two years, I was able to build APIs and frontend applications to improve the quality of life of existing projects, in addition to being able to make integrations to improve not only customers workflow, but also availability and reliability in the data sent and received.

Most of my experience comes down to working with React, SpringBoot, Angular, Oracle SQL and Node.

## Experience

Fullstack Developer Junior – Memora - Processos Inovadores

Duration: may/2021 to july/2023 (2 years and 3 months)
